

# DIPLOMA

## OF INFORMATION TECHNOLOGY (GENERAL) (ICA50105)

Microsoft® IT Academy  
Program Member

### ABOUT THE COURSE

The Integrity Business College (IBC) Diploma of Information Technology (General) Accredited Training Program is for anyone wishing to be assured of a successful career in Computer Servicing, Network Administration, Systems Administration and Systems Integration.

### ADDED VALUE

Included with the course comes free access to the Microsoft IT Academy, Certiprep (Practice Exams) and Certiport (Microsoft Office Specialist Exams). This gives you 24/7 online access to the Microsoft Office Certified Courses and Microsoft Office Specialist Certification.

### VOCATIONAL OUTCOMES

- Network Administrator
- Network Manager
- Systems Integration Officer
- Systems Testing Officer
- Computer Servicing Officer
- Desktop Support Officer
- Help Desk Officer
- User/Technical Support Officer
- Project Administrator
- Systems Administrator
- Network Engineer

### QUALIFICATIONS

This qualification provides a participant the skills and core body of knowledge within these "highly regarded" (in demand) qualifications and prepares participants applying and sitting for the respective International Certification Examinations.

### PREREQUISITES

Prerequisite units are units that need to be completed as a prerequisite of the Diploma of IT. These units are a balanced mix of Cert I, II, III & IV in IT. Completing these units ensures the participants have a good grounding in concepts and practice before embarking on the Diploma units.

### RELEVANT, PRACTICAL AND HANDS ON

The IBC qualifications delivered can lead to a Microsoft Certified Systems Administrator/Engineer (MCP/MCSA/MCSE). The training program is relevant, practical, and hands on. The program provides a foundation for further study towards MCSE, CCNP, CCIE, Network Security Specialist, or a Uni Degree.

IBC encourages trainees with physical and / or intellectual disabilities to access funded training

### COURSE SUBJECTS

The IBC Diploma contains 6 Phases. Each phase consists of a specified number of hours, which may include lectures, tutorials, practical exercises, assignments, and directed private study.

### COURSE OUTLINE

The six phases:  
Phase I: Project Management  
Phase II: Research & Design  
Phase III: Build & Install  
Phase IV: Network Security  
Phase V: Web Design  
Phase VI: Network Maintenance

### FEES

- Government Funding Available - This training can be delivered with Government funding to suitable applicants or on a Fee For Service basis
